Funding Opportunities for International Projects

OIRC curates external funding opportunities for international research from a comprehensive suite of sources, along with our knowledge of the donor landscape. While we organize these opportunities around MSU's four global research priorities (Agriculture & Food; Environment, Energy, & Water; Health & Nutrition; and Education & Engagement), we also include opportunities from other fields, along with scholarships and fellowships. We send these out in our weekly email funding update along with any interesting news items or relevant events.
